[The D-Day Training Pocket Manual, 1944 Oct 16 2021](#) Using excerpts from contemporary training manuals, this pocket manual is an insight into the preparation of the troops involved in Operation Overlord. The success of the D-Day landings on June 6, 1944, depended on thousands of troops carrying out their mission and the seamless coordination of the amphibious landings with paratrooper and glider assaults. The troops not only had to be trained up ready for their own roles, but to work alongside other troops, often coordinating activities and communicating with other troops while in unfamiliar terrain and under fire. This pocket manual brings together excerpts from Allied manuals used in the preparation for D-Day, including amphibious landings and managing beachheads, pathfinder, paratrooper, and glider pilot training, and infantry and armored fighting in the bocage countryside. "Chris McNab is a prolific writer who knows what he is doing, as this book shows; and this volume will fit well with its stable mates." —War History Online

[Sugar Gliders May 23 2022](#) In some ways, sugar gliders are the epitome of an exotic pet. Hailing from the rainforests of Australia, they can glide like a flying squirrel and have a pouch like a kangaroo. They're also very affectionate and form close bonds with their keepers, defying the expectation most people have of keeping exotic pets. Once you get to know them, you'll find this isn't the only surprising thing about them. With the intelligence of a cat, the loyalty of a dog, and a diet closer to a lizard's than a hamster's, sugar gliders are one of the most unique and rewarding animal companions you can bring into your home. But how can you be sure you can handle a sugar glider's care? And even if you can, is it the right pet for you? This book takes an in-depth look at a sugar glider's diet, ideal environment, and daily care. You'll learn where to shop for sugar glider and how to tell if they're healthy, as well as how to best replicate their wild environment in the comfort of your own home. Though they're not susceptible to many medical issues, you'll also learn the signs to look out for in case of illness or injury, and how to best prevent and treat these problems to keep your sugar glider happy and healthy. The recent popularity of sugar gliders in the pet trade has prompted an upswing in breeding across North America, and pet owners now have more knowledge about the proper care of this fascinating animal than ever before. Using the cage and diet recommendations in this book, you can have a loving relationship with your sugar gliders for ten years or more. Just like a cat or dog, a well cared for sugar glider will pay you back tenfold in cuddly entertainment-and from a pet small enough to ride around in your pocket.

Introduction to a Glider Flight Examiner Manual (FEM) Apr 10 2021 Francesco Daniele Padovano is a gliding instructor with more than 15.000 flights in his experience along with training commercial pilots as a TKI at CAE. He has been one of the main instructors of the national school in Spain and holds active SPL FI-FI, Acro and TMG ratings. Among others, he has laid the foundations of the gliding training programme in Colombia and has taught in the Argentinean army in their courses dedicated to drone pilot training. He is currently developing a programme dedicated to children at risk of exclusion with a motivational programme through gliding and collaborating with various vocational schools to complement the training with gliding. He is the author of several publications in the aeronautical field: "El Manual del piloto de vuelo sin motor", "Manual del instructor de vuelo sin motor", "Meteorologia para drones", "Glider Flight Instructor Manual, development of the first period-basic course based on the EASA SFCL regulation of march 2020 with the introduction of competence criteria". This book wishes to propose a standard for SPL examiners based on CBTA (Competence Training and Assessment) and related mission sheet. After the publication of the book "Glider flight instructor manual" with the introduction of the competence criteria (CBTA), this text is the natural evolution because, if a competence-based teaching system is proposed, the evaluation at examination level of the candidates for obtaining the licences and ratings, foreseen in the EASA regulation EU 2020/358, remains unresolved. Therefore, this text aims to provide a solution to the doubts that may arise for examiners when conducting an examination.
