Dockside Reading Dec 11 2020 In *Dockside Reading* Isabel Hofmeyr traces the relationships among print culture, colonialism, and the ocean through the institution of the British colonial Custom House. During the late nineteenth and early twentieth centuries, dockside customs officials would leaf through publications looking for obscenity, politically objectionable materials, or reprints of British copyrighted works, often dumping these condemned goods into the water. These practices, echoing other colonial imaginaries of the ocean as a space for erasing incriminating evidence of the violence of empire, informed later censorship regimes under apartheid in South Africa. By tracking printed matter from ship to shore, Hofmeyr shows how literary institutions like copyright and censorship were shaped by colonial control of coastal waters. Set in the environmental context of the colonial port city, *Dockside Reading* explores how imperialism colonizes water. Hofmeyr examines this theme through the concept of hydrocolonialism, which puts together land and sea, empire and environment.

American Reform Judaism Apr 14 2021 The only comprehensive and up-to-date look at Reform Judaism, this book analyzes the forces currently challenging the Reform movement, now the largest Jewish denomination in the United States. To distinguish itself from Orthodox and Conservative Judaism, the Reform movement tries to be an egalitarian, open, and innovative version of the faith true to the spirit of the tradition but nonetheless fully compatible with modern secular life. Promoting itself in this way, Reform Judaism has been tremendously successful in recruiting a variety of people—intermarried families, feminists, gays and lesbians, and interracial families among others—who resist more traditional forms of worship. As an unintended result of this success, the movement now struggles with an identity crisis brought on by its liberal theology, which teaches that each Jew is free to practice Judaism more or less as he or she pleases. In the absence of the authority that comes from a theology based on a commanding, all-powerful God, can Reform Judaism continue to thrive? Can it be broadly inclusive and still be uniquely and authentically Jewish? Taking this question as his point of departure, Dana Evan Kaplan provides a broad overview of the American Reform movement and its history, theology, and politics. He then takes a hard look at the challenges the movement faces as it attempts to reinvent itself in the new millennium. In so doing, Kaplan gives the reader a sense of where Reform Judaism has come from, where it stands on the major issues, and where it may be going. Addressing the issues that have confronted the movement—including the ordination of women, acceptance of homosexuality, the problem of assimilation, the question of rabbinic officiation at intermarriages, the struggle for acceptance in Israel, and Jewish education and others—Kaplan sheds light on the connection between Reform ideology and cultural realities. He unflinchingly, yet optimistically, assesses the movement's future and cautions that stormy weather may be ahead.

Environmental Cleanup at Navy Facilities Jan 12 2021 The fiscal and technological limitations associated with cleaning up hazardous waste sites to background conditions have prompted responsible parties to turn to risk-based methods for environmental remediation. Environmental Cleanup at Navy Facilities reviews and critiques risk-based methods, including those developed by the U.S. Environmental Protection Agency and the American Society of Testing and Materials. These critiques lead to the identification of eleven criteria that must be part of any risk-based methodology adopted by the Navy, a responsible party with a large number of complex and heavily contaminated waste sites.
