[The Complete Facilitator's Handbook](#) Jul 05 2020 John Heron, well known for his previous books, The Facilitator's Handbook (1989) and Group Facilitation (1993), both of which have become standard reading on the subject, now integrates, builds on and updates those works to provide this comprehensive guide to making a success of facilitation. The key to the new book lies in the way in which it helps facilitators to understand and develop a personal style to their work. Analytical in approach and highly structured, it offers strong theoretical content on the fundamental thinking underlying facilitation (which includes exploration of its dimensions and modes, whole person learning, and a comprehensive group dynamic theory) but combines this with a wide repertoire for practical action designed to enable facilitators to build up their skills effectively. John Heron's distinctive merit here is his demonstration of the benefit to be derived when such skills not only suit facilitator's own personality but can also be matched to whatever situation facilitators encounter. This publication makes John Heron's seminal work newly accessible - for it is now available for the first time in paperback - to a new generation of facilitators in both training and education.

Pathways to Recovery Group Facilitator's Guide Mar 25 2022 Since the first printing of Pathways to Recovery, people immediately worked to start groups with little guidance on how to do it. Some were held in formal settings while others were conducted with just two or three people in someone's living room. In most, participants found themselves completing the exercises, discussing the quotations or even arguing about whether certain topics should be included in one chapter or another! With so many formats emerging, determining how to create a facilitator's guide was quite a challenge. The current guide is designed to be easy to navigate and use, even for first-time group facilitators. Modules include the following: \*An overview and goals for the topic \*Recommended readings, materials and handouts \*Specific tips for facilitators and notes to guide each session \*Detailed agendas with suggested activities \*The guide gives group leaders all the

information needed to facilitate a Pathways to Recovery group, including tips on how to adapt the sessions to meet specific needs. While some groups have taken over a year to cover all the material in the workbook, still others have found it possible to cover one chapter a week. In whatever way you decide to conduct your local group, the material found in this guide will be helpful to you.

Evaluating Communication for Development Dec 22 2021 Evaluating Communication for Development presents a comprehensive framework for evaluating communication for development (C4D). This framework combines the latest thinking from a number of fields in new ways. It critiques dominant instrumental, accountability-based approaches to development and evaluation and offers an alternative holistic, participatory, mixed methods approach based on systems and complexity thinking and other key concepts. It maintains a focus on power, gender and other differences and social norms. The authors have designed the framework as a way to focus on achieving sustainable social change and to continually improve and develop C4D initiatives. The benefits and rigour of this approach are supported by examples and case studies from a number of action research and evaluation capacity development projects undertaken by the authors over the past fifteen years. Building on current arguments within the fields of C4D and development, the authors reinforce the case for effective communication being a central and vital component of participatory forms of development, something that needs to be appreciated by decision makers. They also consider ways of increasing the effectiveness of evaluation capacity development from grassroots to management level in the development context, an issue of growing importance to improving the quality, effectiveness and utilisation of monitoring and evaluation studies in this field. The book includes a critical review of the key approaches, methodologies and methods that are considered effective for planning evaluation, assessing the outcomes of C4D, and engaging in continuous learning. This rigorous book is of immense theoretical and practical value to students, scholars, and professionals researching or working in development, communication and media, applied anthropology, and evaluation and program planning.

Managing Systems for Better Health Jan 29 2020 This book, published by the Western Pacific Office of the World Health Organization, serves as guidelines for applying an interactive approach to health management development. This approach combines the development of human resources, management systems, and policies. It focuses on the involvement of national staff in the evaluation of their work and professional practices. Their participation centers on establishing more effective policies and procedures and on improving their managerial skills. This manual targets mainly national facilitators who are trained to promote management development. They initiate, prepare, conduct, and follow-up on national activities in management development as well as continue their duties as senior health officials. The handbook's introduction addresses the rationale for this integrated approach to health management development, the approach itself, the workshop as a system, the role of national facilitators, and the development process and its measures of success. Part II examines the training protocols, each of which includes the outline of each workshop session, a lesson plan for each session, and notes for the facilitator. These protocols are district level management and planning, supervision of health personnel, management of the drug supply support system, and health sector financial planning. Part III is a module for workshop leaders entitled Training National Facilitators for Health Management. The annexes include a list of national facilitators for the Western Pacific region, a checklist of facilitator's responsibilities, an example of a workshop schedule, facilitator guidelines on managing a group process and on conducting a workshop session, self-assessment for managers of health care, a glossary, an exercise in terminology and team building, a technical report on district level management, and applications of the approach in South Pacific Island nations.
