Mapping Forest Landscape Patterns Nov 02 2020 This book explores the concepts, premises, advancements, and challenges in quantifying natural forest landscape patterns through mapping techniques. After several decades of development and use, these tools can now be examined for their foundations, intentions, scope, advancements, and limitations. When applied to natural forest landscapes, mapping techniques must address concepts such as stochasticity, heterogeneity, scale dependence, non-Euclidean geometry, continuity, non-linearity, and parsimony, as well as be explicit about the intended degree of abstraction and assumptions. These studies focus on quantifying natural (i.e., non-human engineered) forest landscape patterns, because

those patterns are not planned, are relatively complex, and pose the greatest challenges in cartography, and landscape representation for further interpretation and analysis.

URBAN CORPORIS. The City and the Skin Jun 09 2021 In this Urban Corporis volume, 'The city and the skin?', we asked the authors to read, define and interpret the role of the skin as a facade, as a protection, as a compositional image of urban revelation. Without formal restrictions, without ethical preconceptions: the skin as part of the building designed to mediate the relationship. The architectural skin, understood as the technological system of delimitation between architectural space and unbuilt environment, can be analyzed as a boundary system between interior and exterior, the most evident expression of the identity of an artifact. In this dual role of border and interface, receptive as active, the skin of an architecture (seen also through art) is charged with a double value: an element of covering and protection and, at the same time, a tool of relationship and interface, in fact, towards the external world.

The problem? He's not interested. Not even a little. But Viola cannot afford to lose. And she has her heart set on James. If only he will bend to a bit of persuasion. Is an earl like no other... James Kilbrenner knows how determined the entirely-too-beautiful Miss Darling can be--the daft woman cornered him at a perfectly respectable dinner and mangled his cravat before he could escape. Thrown in her path by a meddling marchioness, James finds himself under sensual siege from a tiny, flirtatious sprite who puts both his heart and his vow to remain unwed at risk. The City as a Project Oct 21 2019 The city is often depicted as a sort of self-organizing chaos. This collection of essays, edited by Pier Vittorio Aureli, makes the case for the opposite hypothesis: The city is always the result of political intention, often in the form of specific architectural projects. Cities are shaped not only by material forces, but also by cultural and didactic visions. This thesis is substantiated by eight thoroughly researched essays scrutinizing a fascinating line-up of urban conditions across more than two thousands years of history: from the political theology of the Islamic city to the political economy of Renaissance architecture; from the rise of public architecture in 17th-century France to the laissez-faire development of the contemporary Greek city; from the exemplary teachings of Jean-Nicolas-Louis Durand to the collaborative work of Hannes Meyer; and from the plan of the Mesoamerican metropolis to that of the Fordist factory floor. In challenging the split between theory and practice, *The City as a Project* reveals the powerful ways in which the city arises from the constant interaction between ideas and spatial conditions.

The Alexandreis Jun 21 2022 Walter of Châtillon's Latin epic on the life of Alexander the Great was a twelfth- and thirteenth-century “best-seller:” scribes produced over two hundred manuscripts. The poem follows Alexander from his first successes in Asia Minor, through his conquest of Persia and India, to his progressive moral degeneration and his poisoning by a disaffected lieutenant. The *Alexandreis* exemplifies twelfth-century discourses of world domination and the exoticism of the East. But at the same time it calls such dreams of mastery into question, repeatedly undercutting as it does Alexander's claims to heroism and virtue and by extension, similar claims by the great men of Walter's own generation. This extraordinarily layered and subtle poem stands as a high-water mark of the medieval tradition of Latin narrative literature. Along with David Townsend's revised translation, this edition provides a rich selection of historical documents, including other writings by Walter of Châtillon, excerpts from other medieval Latin epics, and contemporary accounts of the foreign and “exotic.”

Katie's Cabbage reminds us of how small things can grow and thrive when nurtured with tender loving and care and of how one person, with the support of family, friends, and community, can help make a powerful difference in the lives of so many. Katie's Cabbage was illustrated by Karen Heid, associate professor of art education at the University of South Carolina School of Visual Art and Design. Editorial assistance was provided by Michelle H. Martin, a dedicated gardener and the Augusta Baker Chair in Childhood Literacy at the University of South Carolina School of Library and Information Science. Survive Coronavirus May 28 2020 Survive Coronavirus, is written by Kevin L. Michel, a Performance Psychology Consultant, based in New York City. Without governmental action, ultimately, up to 80% of some populations shall be infected with Coronavirus, which causes COVID-19. With effective governmental action, that percentage can be significantly reduced. The countries that shall do best, are the countries where the government was most prepared. Similarly, for those most at risk, the individuals who shall do the best, shall include the ones who were most prepared. Now is your time to prepare. You should avoid the virus as best you can, but you must also prepare for the worst. What shall you do if you get COVID-19? What steps shall you take to improve your odds of survival? This book is your guide in case you are infected with the Coronavirus, or if you suspect that you have been infected. The book is valuable for those who want to be prepared well in advance of such an event. Read the book today, because with the fatigue of an infection, you may not have the energy to read later, when it becomes most necessary. Be prepared now, for the worst. **Survive Coronavirus**, begins with standard public guidelines gathered from the top governmental agencies, such as the NIH, CDC, and NHS, and then progresses to guidelines from the author on what you should do to give yourself the best chance of survival if/when infected by the Coronavirus. An equation of survival is provided in the third chapter, breaking down the fundamental behaviors and factors that may determine whether you live or die. This equation gives the reader a sense of control, and provides actionable steps to win the battle before you. From the author: I went out for a run today, which was my one-a-day form of exercise during the Stay-At-Home order currently in NYC. I ensured that I maintained social distancing, weaving around the handful of other runners and pedestrians, ensuring that I never got too close. I live in Astoria, Queens, and I made a left on 30th Avenue, past the major hospital - the Mount Sinai Medical Center. Then I saw it. The giant, white, refrigerated truck that is to be used to store the bodies of the dead. I had seen it mentioned on CNN earlier, but it is so eerie to see it in person. I write this book with the best of intentions, to be helpful to you, and to be helpful to me. I have done my best to locate valid and helpful research, and to logically consider the challenge ahead, and present these insights in a relatively brief and readable format - but I am not a medical professional. There are real risks to life here - this pandemic is real. Having seen the truck, I know that if I fail, that shall be where it ends. I want you to be prepared, and I want you to have a strategy if you do get infected. This book is for us both.

Castro's Daughter Feb 17 2022 "Mommy, mommy, call him. Tell him to come here right away. I have so many things to tell him!" I had a ton of things to tell him. I wanted him to find a solution to all the shortages of clothes; of meat, so it would again be distributed through the ration books. I also wanted to ask him to give our Christmas back. And to come live with us. I wanted to let him know how much we really needed him... Fidel didn't answer my letter. I kept writing him letters from a sweet and well-behaved child, a brave but sad girl. Letters resembling those of a secret, spurned lover... As a girl growing up in Cuba, Alina Fernandez found nothing abnormal in the fact that Fidel Castro would occasionally visit her house bearing gifts just for her. At the age of ten, her mother finally told her the truth: she was Castro's Daughter.
