Medical Surgical Nursing Care Nov 04 2020 *Medical Surgical Nursing Care 3e* has an even stronger focus on the professional Practical nursing program and is a key component in the LPN/LVN series at Pearson. It has a clear and readable writing style, it provides a strong foundation for understanding common disorders that affect adults. Opening units of the book focus on concepts, issues, and foundational knowledge. The units that follow focus on common diseases and disorders organized by body system.

Each unit begins with review of the system's structure and function, nursing assessment, and commonly used diagnostic tests for disorders of that system. To facilitate learning, disorder-specific content follows a consistent pattern, beginning with discussion about the disorder, its risk factors, causes, effects on the body, manifestations, and possible complications. Because nurses are integral members of the healthcare team, interdisciplinary care sections include nursing implications for medications, nutritional therapies, surgery and other treatments, including complementary therapies. Each disorder concludes with nursing care, including priorities of care, health promotion, assessment, nursing care measures, and a section addressing continuity of care to home or the community. This text provides more depth in common disease processes, their treatment, and related nursing care. Although organized by body systems for clarity, the book retains a nursing focus throughout. Rationales are provided for nursing interventions to help the student understand the why, not just the what.

Psychiatric Nursing Care Plans - E-Book Feb 25 2020 The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools,

NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental

and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.
