*Stories of Capitalism* Nov 04 2020  
The financial crisis and the recession that followed caught many people off guard, including experts in the financial sector whose jobs involve predicting market fluctuations. Financial analysis offices in most international banks are supposed to

forecast the rise or fall of stock prices, the success or failure of investment products, and even the growth or decline of entire national economies. And yet their predictions are heavily disputed. How do they make their forecasts—and do those forecasts have any actual value? Building on recent developments in the social studies of finance, *Stories of Capitalism* provides the first ethnography of financial analysis. Drawing on two years of fieldwork in a Swiss bank, Stefan Leins argues that financial analysts construct stories of possible economic futures, presenting them as

coherent and grounded in expert research and analysis. In so doing, they establish a role for themselves—not necessarily by laying bare empirically verifiable trends but rather by presenting the market as something that makes sense and is worth investing in. *Stories of Capitalism* is a nuanced look at how banks continue to boost investment—even in unstable markets—and a rare insider's look into the often opaque financial practices that shape the global economy.

### **Minilateralism in the Indo-Pacific**

Nov 16 2021 While US-centred bilateralism and ASEAN-led

multilateralism have largely dominated the post-Cold War regional security architecture in the Indo-Pacific, increasing doubts about their effectiveness have resulted in countries turning to alternative forms of cooperation, such as minilateral arrangements.

Compared to multilateral groupings, minilateral platforms are smaller in size, as well as more exclusive, flexible and functional. Both China and the US have contributed to minilateral initiatives in the Indo-Pacific. In the case of the former, there is the Lancang-Mekong

Cooperation mechanism—involving China, Cambodia, Laos, Myanmar, Thailand and

Vietnam—established in 2015. In the case of the latter, there has been a revival of the Quadrilateral Security Dialogue in 2017—involving the US, Australia, Japan and India.

This book examines the rise of these arrangements, their challenges and opportunities, as well as their impact on the extant regional security architecture, including on the ASEAN-led multilateral order. A valuable guide for students and policy-makers looking to understand the nature and development of

minilateralism in the Indo-Pacific region.

Firm Value Oct 15 2021 This edited volume aims to discuss the most contemporary state of the determinants of the firm value. This book presents theoretical works as well as empirical studies that contrast the arguments offered by the leading, ground-breaking theories on the firm value. What variables determine the firm value? Are these determinants controllable or uncontrollable by the managers of the companies? Is the impact of corporate governance systems on the firm value symmetrical between different institutional contexts? Do the

financial reports affect the value of the firm? What role does corporate social responsibility play as a determinant of the firm value? These and other questions are analyzed and scrutinized step by step throughout this book.

It discusses how to best provide regional public goods that transcend the so-called "collective action problem," which occurs when individual interests are too weak on their own to drive cooperation on common issues. The chapter suggests that multilateral development banks should act as honest broker in enhancing mutual trust and facilitating regional cooperation for regional public

Hollywood Harmony Feb 19 2022 Film music often tells us how to feel, but it also guides us how to hear. Filmgoing is an intensely musical experience, one in which the soundtrack structures our interpretations and steers our emotions. Hollywood Harmony explores the inner workings of film music, bringing together tools from music theory, musicology, and music psychology in this first ever book-length analytical study of this

culturally central repertoire. Harmony, and especially chromaticism, is emblematic of the "film music sound," and it is often used to evoke that most cinematic of feelings-wonder. To help parse this familiar but complex musical style, Hollywood Harmony offers a first-of-its kind introduction to neo-Riemannian theory, a recently developed and versatile method of understanding music as a dynamic and transformational process, rather than a series of inert notes on a page. This application of neo-Riemannian theory to film music is perfect way in for

curious newcomers, while also constituting significant scholarly contribution to the larger discipline of music theory. Author Frank Lehman draws from his extensive knowledge of cinematic history with case-studies that range from classics of Golden Age Hollywood to massive contemporary franchises to obscure cult-films. Special emphasis is placed on scores for major blockbusters such as Lord of the Rings, Star Wars, and Inception. With over a hundred meticulously transcribed music examples and more than two hundred individual movies discussed, Hollywood
