Desire Lines Jan 23 2022 Desire lines are the paths that people create through regular usage. They appear where people repeatedly choose to walk and usually signify a route from A to B that's quicker than the formal path provided. In most cases they indicate the mismatch between what local people want and what designers think people want. By employing some social research basics in the design development process, placemakers can work more meaningfully with local communities to meet their needs and aspirations. This is a practical guide to running public consultations, co-design and community engagement to help practitioners make the most of local knowledge and insight for the benefit of design. It offers guidance on managing community participation, and unapologetically aims to encourage designers to start thinking like social researchers when they undertake these programmes. It's intended for placemakers - architects, urban designers, landscape architects, and other built environment professionals involved in the planning and design of public realm - who want to develop more people-centred, community-led design approaches.

While this strategy has enriched companies almost beyond measure, it has taken billions of dollars out of the pockets of consumers and imposed massive environmental costs on the planet. In *The Right to Repair*, Aaron Perzanowski analyzes the history of repair to show how we've arrived at this moment, when a battle over repair is being waged - largely unnoticed - in courtrooms, legislatures, and administrative agencies. With deft, lucid prose, Perzanowski explains the opaque and complex legal landscape that surrounds the right to repair and shows readers how to fight back.

[Martine's Hand-Book of Etiquette and Guide to True Politeness](#) Jun 03 2020 Excerpt from Martine's Hand-Book of Etiquette and Guide to True Politeness: A Complete Manual for Those Who Desire to Understand the Rules of Good Breeding, the Customs of Good Society, and to Avoid Incorrect and Vulgar Habits I shall not go so far; but hardly know what we should think of a sportsman who would attempt to bring down a bird before he had loaded his gun. I have purposely reserved the egotistical bore for the last on this short and imperfect list. It is truly revolting, indeed, to approach the very Boa-constrictor of good society; the snake who comes upon us, not in the natural form of a huge, coarse, slow reptile, but Proteus-like, in a thousand different forms though all displaying at the first sight the boa-bore, ready to slime over every subject of discourse with the vile saliva of selfish vanity. Pah! it is repulsive even to speak of the species, numerous, too, as the sands along the shore. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. He knows that contemporary capitalism has a perverse habit of dismantling itself and gives us a toolkit to build a new, more socially just edifice."—Andy Merrifield, *Magical Marxism* "Insightful and incisive, thoughtful and thorough, filled with new avenues for thinking about resistance. Pass this one by at your own peril."—Matt Hern, *Common Ground in a Liquid City* To imagine how we might change capitalism, we first need to understand it. To succeed in actually changing it, we need to be able to explain how it works and convince others that change is both possible and necessary. *Disassembly Required* is an attempt to meet those challenges, and to offer clear, accessible alternatives to the status quo of everyday capitalism. Originally crafted as a comprehensive overview for younger readers, Geoff Mann's explanation of the fundamental features of contemporary capitalism is illustrated with real-world examples?an ideal introduction for anyone wanting to learn more about what capitalism is and where it falls short. What emerges is an anti-capitalist critique that fully understands the complex, dynamic, robust organizational machine of modern economic life, digging deep into the details of capitalist institutions and the relations that justify them to unearth the politically indefensible and ecologically unsustainable premises that underlie them. Geoff Mann teaches political economy and economic geography at Simon Fraser University, where he directs the Centre for Global Political Economy. He is the author of *Our Daily Bread: Wages, Workers and the Political Economy of the American West* (2007) and a frequent contributor to *Historical Materialism* and *New Left Review*.
